Live Webcast
of the
Federal Energy Regulatory Commission Reliability Technical Conference
FERC Docket No. AD12-1-000

The Federal Energy Regulatory Commission (FERC) will hold a Technical Conference on
Tuesday, November 29, 2011, and Wednesday, November 30, 2011.

The purpose of this technical conference is to discuss policy issues related to reliability of the Bulk-Power System. The conference will explore the progress made on the priorities for addressing risks to reliability that were identified in earlier FERC technical conferences. The conference also will discuss emerging issues, including processes used by planning authorities and other entities to identify reliability concerns that may arise in the course of compliance with Environmental Protection Agency regulations, and the tools and processes (including tariffs and market rules) available to address any identified reliability concerns.

The agenda for this conference can be found on the FERC website at:
www.ferc.gov/eventcalendar/Files/20111007135931-AD12-1-000TC1.pdf

(Two or more PSC commissioners may be present at various points during this meeting.)
